# Setting up your Brian K Media email account on your Android mobile device.
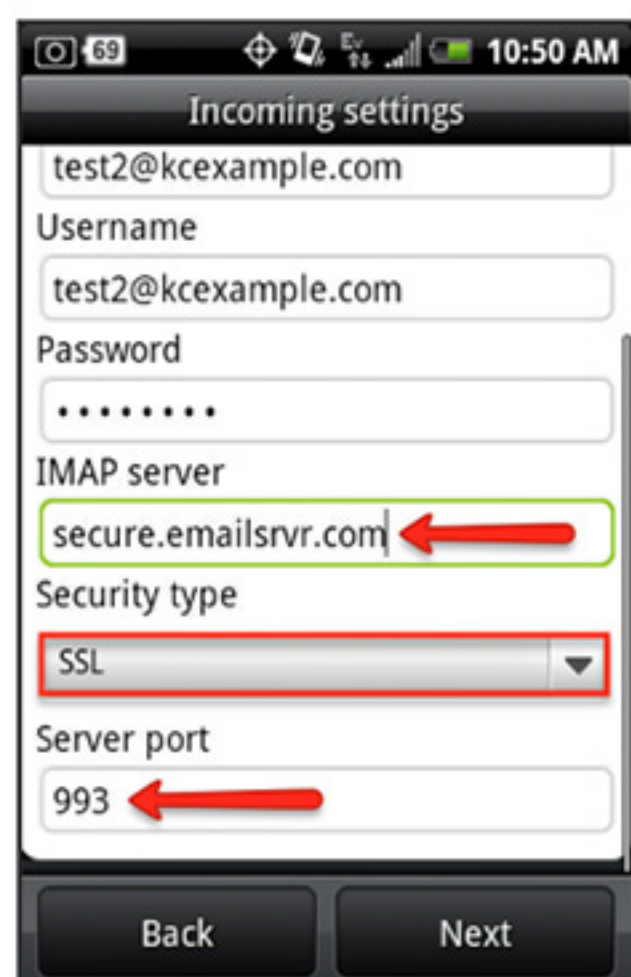

The following information will get your Brian K Media Webmail account setup on your Android using an IMAP connection. An IMAP connection allows you to access and manage your email directly from Brian K Media servers. Any changes made on your device will be replicated on the server. Let's take a look at how to set this up:
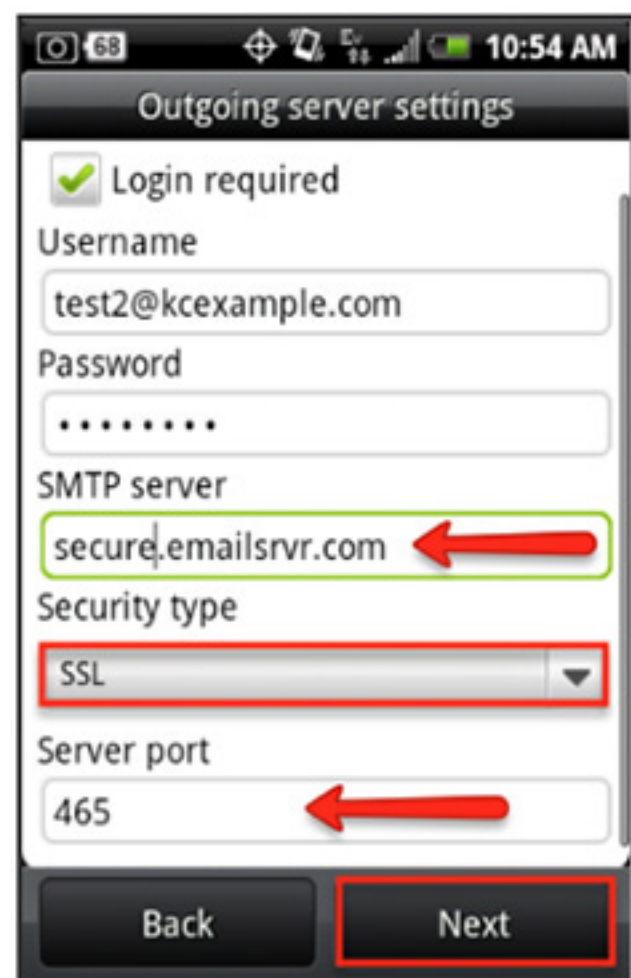

Android Mobile Device Setup

1. From the home screen on your device, tap the **Settings** icon.

2. Next, in the **Incoming Settings** section select IMAP from the drop down menu and enter your email address, username, and password. In the IMAP server field, enter **"secure.emailsrvr.com"** and be sure that **SSL** is selected and **993** is the server port.

3. Next, in the **Outgoing Server Settings** section, in the **SMTP** server field, enter **"secure.emailsrvr.com"** and be sure that SSL is selected and **465** is the server port.

4. In the last screen, give your newly created account a name and then select **Finish Setup**.
